

Staff Report

Report No.: CPS-27-2018
Meeting Date: July 25, 2018
Submitted by: Tiffany Farrell, Director of Corporate Services
Subject: Ontario Community Infrastructure Fund Application

Recommendation:

THAT the application in the amount of \$47,148 funding through the Ontario Community Infrastructure Fund for the Garden Avenue and John Street Storm Sewer Upgrade Project be approved.

Purpose:

To present to Council the project the Municipality is submitting for the funding under the Ontario Community Infrastructure Fund 2018.

Background:

The Ontario Community Infrastructure Fund (OCIF) provides a steady source of predictable, long-term funding and supports the repair and revitalization of roads, bridges and other critical infrastructure in small, rural and northern communities.

Top-Up Application based funding

The top-up component will allow municipalities with critical infrastructure projects to submit proposals to bring their total OCIF funding up to \$2 million over two years. Eligibility for the 2018 intake is targeted to communities whose formula grants in 2017, 2018 and 2019 add up to less than \$2 million and who did not receive funding under the last application-based intake.

If your community is eligible, you may apply for up to 90% of a project's eligible costs or the top-up funding cap.

The top-up funding cap is based on the amount your community is receiving under the formula-based component.

Analysis

Top-Up Application

Middlesex Centre is eligible for the 2018 top-up intake.

Top-up funding cap \$47,148

The application is due August 28, 2018

Staff Report

Financial Implications:

Grant Revenue up to \$47,148 for 2018/2019

Strategic Plans:

Financial: Generate Revenues
