Subject: Middlesex Centre Stormwater Management Master Plan - Public Information Centres
Date: February-19-19 2:13:16 PM
Attachments: [PIC2_Notice_20190118.pdf](#)

Good afternoon Mayor and Councilors,

We will be hosting our second round of Public Information Centres (PICs) for the Middlesex Centre Settlement Area Stormwater Management Master Plan. Please see the attached Notice for dates, times, and locations.

A mailout (email or Canada Post) is being sent to all those who submitted comments to our online webmap created for the study (www.middlesexcentre.on.ca/stormwater), known developers throughout the Municipality, and agency contacts. In addition, the Notice was also included within the municipal water/stormwater bill packages which went out at the beginning of the month. Please feel free to forward this to other who may be interested.

Please feel free to contact either Dan Anderson (anderson@middlesexcentre.on.ca) or myself if you have any questions. Thanks and have a great day!

Stephanie L. Bergman MA, ENV SP

Middlesex Centre Settlement Area Stormwater Master Plan

NOTICE OF PUBLIC INFORMATION CENTRES

Background

Development throughout Middlesex Centre has historically been piecemealed, and has led to a fragmented stormwater management system that is made up of a combination of Municipal Drains and municipal storm sewers. In order to develop a plan for effectively managing stormwater infrastructure for existing areas and to accommodate future growth, the Municipality is developing a Stormwater Master Plan.

The Master Planning Process

The Master Plan is being undertaken in accordance with the Municipal Class Environmental Assessment process (Municipal Engineers Association 2000, as amended in 2007, 2011, and 2015). The Master Plan will consider all aspects of the environment in order to develop a holistic plan for managing this important asset. The Master Plan will be an important resource for the Municipality as it continues to adapt to growth and changing environmental conditions and regulations. The study area for the Master Plan will include the settlement areas of Arva, Birr, Ballymote, Coldstream, Denfield, Ilderton, Kilworth, Komoka, Melrose, Poplar Hill, Bryanston and Lobo. A Stormwater Master Plan has previously been completed for the community of Delaware in 2016.

How can I get involved?

A series of Public Information Centres were held in the Spring of 2018 to introduce the study and an online webmap was created to obtain input on existing drainage conditions and concerns. Input has been considered along with technical, natural, socio-economic, and cultural impacts of alternative solutions, and a draft Master Plan has been developed.

The second round of Public Information Centres (PICs) are being held to present the draft Master Plan recommendations for review and comment. Feel free to drop in at any of the following PICs:

Monday March 4th
6:00pm-8:00pm

London Life Room, Komoka Wellness and Recreation Centre, 1 Tunks Ln, Komoka

Tuesday March 5th
6:00pm-8:00pm

Ilderton Community Centre, 13168 Ilderton Rd, Ilderton

Wednesday March 6th
6:00pm-8:00pm

Bryanston Community Centre, 15321 Plover Mills Rd RR 3, Ilderton

Information presented at the PIC will be made available on the study's website following the PIC (<https://www.middlesexcentre.on.ca/Public/Stormwater>). We encourage residents to attend the PIC to learn more about stormwater servicing throughout the Municipality. Visit the link or contact a member of the study team below for more information or to be added to the study's mailing list to receive future updates. We look forward to seeing you at the PICs!
